Summary

I am a forward-thinking Senior Software Engineer specializing in Full Stack development, with a primary focus on modern frontend architectures using **React**, **TypeScript**, **Python**, **Next.js**, and **Node.js**. Over the past decade, I have built scalable software across diverse sectors like Fintech, e-Commerce, Travel, Delivery, Consulting, and Edtech, focusing on clean UI/UX, product-engineering collaboration, and web performance. I thrive in remote, global teams where I can help bridge the gap between complex technical execution and high-level product goals. I maximize engineering velocity through AI-augmented workflows, leveraging prompt engineering and generative AI tools to accelerate code generation, automate test coverage, and execute intelligent refactoring.

Beyond technical execution, my career is grounded in high autonomy and adaptability, having driven greenfield initiatives end-to-end across fast-changing domains. As a Team Lead, I have paired engineering leadership with strict operational compliance, mentoring engineers and driving governance processes. I apply creative, divergent problem-solving backed by disciplined self-time management to consistently deliver under remote setups. Driven by a pragmatic learn-by-doing philosophy, I continuously acquire new skills through direct implementation, rapidly adapting to new stacks, tools, and business needs as projects demand.

Most recently, I stepped away from full-time work in December 2025 to focus on full-time parenting after the birth of my daughter.

Skills

CORE TECHNOLOGIES: React • TypeScript • Python • Next.js • Node.js

FRONTEND:

TanStack Query (formerly React Query) • Redux • Apollo Client • Context API • React Hooks • MobX • Design Systems • Styled-Components • CSS Modules (CSS-in-JS) • SASS • Core UI • Bootstrap • Materialize • Tailwind CSS • PostCSS • Utility-First CSS • Component-Based CSS • BEM • Atomic Design • Retool (Low-Code Application Infrastructure)

BACKEND: REST • FastAPI • Express.js • Koa.js • GraphQL • Yoga • Laravel (PHP) • PostgreSQL • MySQL • Snowflake

TESTING:

Playwright • Jest • React Testing Library • Vitest • Enzyme • Cypress • TestRail • Unit Testing • Integration Testing • End-to-End (E2E) Testing

AI-AUGMENTED WORKFLOW: Claude Code • Cursor • Gemini Notebook • GitHub Copilot • Perplexity AI • Amazon Q Business

DEVOPS & CLOUD:

Amazon Web Services (AWS) • Docker • Google Cloud Platform (GCP) • Microsoft Azure • Git • GitFlow • GitLab CI/CD • GitHub Actions • Jenkins • Bitbucket • Vagrant

WEB ENGINEERING:

Scrum • Agile • Kanban • Test-Driven Development (TDD) • Behavior-Driven Development (BDD) • Analytics & Event Tracking • Amplitude • Iteratively • Segment • Google Analytics • Adobe Analytics • Quantum Metric • Experimentation • Optimizely • A/B Testing • Unleash (Feature Management) • Performance Optimization • Lighthouse • Web Vitals • Bundle Analyzer • Code Splitting • SSR • SSG • Optimistic UI • Lazy Loading • Pagination & Infinite Scrolling • Debugging & Profiling • React DevTools • Chrome DevTools • New Relic (Digital Experience Monitoring) • Trunk-Based Development

Training

Cursor & Claude Code: Professional AI Setup — Master.dev

Next.js Fundamentals, V4 — Master.dev

AI & Prompting Essentials Specialization — Google/Coursera

Experience

Altruist Corp

Senior Software Engineer, Full Stack

08/2022 - 11/2025

- Engineered UI & backend microservices for tools and SaaS using React SPAs, Next.js, and Retool. Created financial reports, dashboards, and transfer tools. Automated workflows like file parsing and transaction approvals, boosting efficiency
- Architected and executed the full-stack migration of the platform service layer, replacing a complex GraphQL Mesh with a proxy server within a Backend-for-Frontend (BFF) gateway, resolving data synchronization defects and improving API response performance
- Standardized application-wide frontend data fetching by implementing TanStack Query as the standard state management library, leading the technical refactoring toward a modern RESTful architecture
- Maintained and expanded shared UI design system components published as isolated NPM packages, ensuring visual identity, accessibility compliance, and reusability across engineering teams
- Built secure integration layers and role-based access controls for SPAs. Authored backend services for secure URL generation and frontend rendering components
- Implemented a custom backend integration service using Unleash connected to GitLab feature flag infrastructure, providing targeted deployment control, proof-of-concept validation, and user-level feature toggling in production
- Automated static code analysis within GitLab CI/CD pipelines for pull requests to enforce coding standards, audit package dependencies, eliminate dead code, and prevent bundle size inflation

Thrive Market, Inc

Senior Software Engineer, Frontend

05/2021 - 07/2022

- Developed dynamic, high-conversion user interfaces and core e-commerce platform components, including a unified product catalog and shared cart system across the responsive web application
- Built the core analytics tracking infrastructure from scratch by configuring Iteratively and the Amplitude SDK, supplying the data science team with reliable event data to drive product experimentation
- Directed cross-functional A/B testing campaigns across critical conversion funnels, including Product Detail Pages (PDP), Cart, Checkout, Onboarding Quiz, and Membership Management using Optimizely to validate product enhancements and increase user conversion
- Resolved performance bottlenecks, rendering lag, and accessibility flaws as Performance Optimization engineer using strategies like code splitting, pagination, infinite scrolling in SSR and SSG Next.js pages
- Contributed to a component-driven Content Management System (CMS) framework that enabled marketing teams to independently construct and launch digital promotional campaigns

Distillery Tech, Inc

Senior Software Engineer & Team Lead

05/2021 - 11/2025

- Embedded as Senior Software Engineer for high-growth startup clients, including Thrive Market and Altruist
- Assisted engineering leadership in assessing and onboarding candidates for open technical positions
- Led 1:1 syncs with direct reports to track career progression, eliminate technical blockers, and safeguard team performance across client engagements; conducted mentoring sessions on React architecture, state management, and best practices
- Facilitated the execution of company-wide initiatives, including mandatory training, compliance processes, and annual performance review cycles

Great Minds, PBC

Frontend Developer

04/2021 - 05/2021

- Delivered key features, maintenance, and bug fixes to a highly interactive e-learning platform within an event-driven architecture, enabling educators to create custom learning materials like quizzes, presentations, flashcards, infographics, and mind maps

Experience

American Express Company / iSeatz, Inc.

Frontend Developer

02/2017 - 03/2021

- Co-authored the codebase of a travel and loyalty rewards booking platform from the ground up utilizing React and Redux, achieving strict pixel-perfect implementation against comprehensive design system specs
- Coded complex modules from the scratch like multi-flight selection, cabin seat selection, dynamic CMS-driven modal dialogues, and deep-linking routing
- Integrated global reservation inventories from Expedia with American Express backend loyalty reward APIs to deliver flight, hotel, and activity booking experiences; collaborated directly with client technical leads, business analysts, designers, and QA teams to translate complex business requirements into user-friendly workflows and new features
- Enhanced release predictability by improving CI/CD pipelines stages in Jenkins and contributing to the foundation of the platform's automated end-to-end testing framework

Globant S. A

Software Designer & Senior Web UI Developer

02/2017 - 05/2021

- Promoted to Software Designer in 2020 (Software Engineer III equivalent) in recognition of technical leadership, solution design, and consistent delivery on client engagements including Great Minds and iSeatz / American Express

Independent Consultant

Full Stack Web Developer

07/2016 - 02/2017

- Customized and deployed a SaaS e-commerce ordering and delivery platform for local market launch, aligning UI/UX with corporate branding, resolving core software issues, and integrating payment gateways, email marketing, and analytics plugins
- Redesigned user flows and published a hybrid on-demand parcel delivery mobile application built with AngularJS and Apache Cordova, managing full app publishing workflows across the Apple App Store and Google Play Store
- Modernized legacy client web applications by introducing Node.js, NPM workflows, and automated build tools (Gulp, Babel, Browserify), guiding local businesses from legacy monoliths to modern JavaScript architectures

PME Consulting

Web Developer & IT Collaborator

02/2015 - 07/2016

- Developed web applications and responsive microsites using PHP (Laravel), JavaScript, Bootstrap, and PostgreSQL, incorporating SEO optimization, social media marketing integration, and web analytics tracking
- Collaborated on enterprise consulting engagements to define and restructure digital business strategies, applying Lean Startup and Design Thinking frameworks to prototype and validate digital products
- Managed cloud and web IT infrastructure across Google Cloud Platform and Microsoft Azure (VPS), handling DNS administration, web hosting, domain management, and server configurations

REACH / UASLP

Database Developer

08/2014 - 02/2015

- Designed and maintained real-time relational database schemas (MySQL) for a specialized solar energy telemetry web platform
- Authored optimized SQL stored procedures to process and aggregate real-time sensor data streams into actionable key performance indicators (KPIs) and analytical reports for end clients

Education

Universidad Autónoma de San Luis Potosí

San Luis Potosí, México

Bachelor's Degree, Informatics Engineering

2009 - 2015

- Information Technology & Software Engineering
