EXPERIENCE

Senior Software Engineer & Company Team Lead 05/2021 - 11/2025

[Distillery Tech, Inc](#)

Remote

AI-Powered, Premier Nearshore Software Development

Senior Software Engineer, Full Stack (via Distillery) 08/2022 - 11/2025

[Altruist Corp](#)

Remote

FinTech, Financial Services

- Architected and led the full-stack migration of the core platform's data-fetching layer, deprecating a complex GraphQL Mesh in favor of a robust Koa.js proxy server in a Backend-for-Frontend gateway. This initiative resolved critical data synchronization issues, reduced system complexity, and significantly improved developer experience and API performance.
- Pioneered and drove the adoption of TanStack Query as the primary state management library for the frontend, leading the subsequent refactor of the entire application to align with a modern, RESTful architecture.
- Developed a suite of high-impact internal tools and financial report generators using Retool, enabling operations teams to automate complex workflows such as financial file parsing, transaction approvals, and gain/loss analysis, directly increasing operational efficiency.
- Enhanced application-wide UX and security by implementing state-driven URL management for complex modules, architecting role-based access controls, and building a scalable feature flag system to de-risk production releases.

Senior Software Engineer, Frontend (via Distillery) 05/2021 - 07/2022

[Thrive Market, Inc](#)

Remote

e-Commerce, Wellness and Fitness Services

- Built the company's core analytics pipeline by implementing the Amplitude SDK, providing the Data team with clean event data to drive product experimentation.
- Partnered with Product to launch high-impact A/B tests using Optimizely, successfully validating new features and increasing user conversion rates.
- Contributed to the component-driven CMS framework that enabled the Marketing team to independently build and launch their own content campaigns.
- Developed the platform's foundational e-commerce systems, including the unified product catalog and shared cart, to ensure a seamless and scalable shopping experience.

Software Designer & Senior Web UI Developer 02/2017 - 05/2021

[Globant S.A.](#)

Remote

AI-Native Technology Services

- Promoted to Software Designer on 2020 after consistently taking the lead on the design and development of successful client applications.

Frontend Developer (via Globant) 04/2021 - 05/2021

[Great Minds, PBC](#)

Remote

EdTech, Education

- Built key features for a major e-learning platform, directly helping educators and students access better instructional content.

ABOUT ME

I'm a Full Stack Engineer with a high specialization on Frontend using React, TypeScript, Next.js, and Node.js. With 10+ years of experience building software across FinTech, e-Commerce, Travel, and EdTech, my work places a strong emphasis on UI/UX, product-engineering collaboration, scalable architecture, web optimization, and business-focused enhancements.

I thrive in remote global environments where I can bridge the gap between complex engineering and product goals.

TECHNICAL SKILLS

Core Technologies

React • TypeScript • Next.js • Node.js

Frontend

TanStack Query • Redux • Apollo Client •

MobX • Component-Based CSS •

Utility-First CSS • Styled-Components •

CSS Modules • SASS • Retool

Backend

Koa • Express • PostgreSQL • MySQL •

Snowflake

AI Tooling

Claude Code • Cursor IDE •

Gemini Notebook • ChatGPT

Version Control & CI/CD

GitFlow • Trunk-Based Development •

GitLab CI/CD • GitHub Actions • Jenkins •

Bitbucket

EXPERIENCE

Frontend Developer (via Globant)02/2017 - 03/2021

iSeatz, Inc / American Express CompanyRemote

Travel, Technology, Information and Internet, Financial Services

- Built and scaled the frontend for a large-scale travel booking site, creating a fast and reliable single-page application and its design system with React and Redux.
- Working side-by-side with business and QA teams, I turned complex requirements into user-friendly features for their digital travel commerce platform.
- Helped improve the CI/CD pipeline using Jenkins, which resulted in more stable and predictable software releases.

Full Stack Web Developer07/2016 - 02/2017

Independent ConsultantSan Luis Potosi, Mexico

Self-employed

- Modernized client web applications by introducing Node.js and early automated build tools, helping businesses transition from legacy systems to modern JavaScript architectures.
- Built both web and mobile applications, including integration of critical third-party APIs (like Stripe, PayPal, Google Analytics), and managed server deployment for online products.

Web Developer & IT Collaborator02/2015 - 07/2016

PME ConsultingSan Luis Potosi, Mexico

Business Consulting and Services

- Developed web applications and micro-sites, focusing on SEO and analytics, and provided IT infrastructure support including web hosting and cloud administration for Google Cloud Platform and Azure.

Database Developer (Internship)08/2014 - 02/2015

Universidad Autónoma de San Luis PotosíSan Luis Potosi, Mexico

Education

- Developed and administered database structures for real-time web applications, processing solar energy sensors data to generate key performance indicators (KPIs) for clients.

EDUCATION

Bachelor's Degree, Informatics Engineering (Information Technology & Software Engineering)2009 - 2015

Universidad Autónoma de San Luis PotosíSan Luis Potosi, Mexico

TRAINING / COURSES

Cursor & Claude Code: Professional AI SetupNext.js Fundamentals, v4

Master.dev, June 2026

AI & Prompting Essentials Specialization

Coursera / Google, June 2025

TECHNICAL SKILLS

DevOps & Cloud

AWS S3 · Docker · Google Cloud Platform · Microsoft Azure · Vagrant

Analytics & Event Tracking

Amplitude · Segment · Google Analytics · Adobe Analytics · Quantum Metric

Experimentation

Optimizely · A/B Testing · Unleash · Feature Flag Management

Performance Optimization

Lighthouse · Bundle Analyzer

Debugging & Profiling

New Relic - Digital Experience Monitoring · React DevTools · Chrome DevTools

Testing

React Testing Library · Enzyme · Playwright · Automated Testing · Cypress · Jest · TestRail

Industry Practices

Scrum · Agile · Kanban · JIRA · Test-Driven Development · Behavior-Driven Development
